A new comment has been submitted at [socotransmission.com](http://socotransmission.com).

### COMMENT

#### Meeting Attended:

I was not able to attend a meeting

#### Important Issues:

Health and Safety, Proximity to Residences

#### Property Uses:

Residential

#### Comment:

We prefer that you select corridors that run through routes with the fewest number of residences. Our least favorite route is in map 10, west-most (running right next to our property.) This would double emf exposure to our own residence, whatever that may be now.

If at all possible, please don't use this route. If we can help you in this, please let us know.

Thank you.

## I-178-001: Electrical Characteristics (In Review)

Your email/letter/comment form has been received and your comment noted. Electrical characteristics of the proposed project and mitigation measures will be addressed in the Environmental Impact Statement. The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at <http://www.usda.gov/rus/water/ees/ea.htm>.
